**EXOTIC NEW OFFERINGS ENHANCE MANNINGTON HARDWOOD LINE**

**February 5, 2007** – Today's consumer is fascinated with the exotic. Likewise, the hardwood flooring customer is looking to bring the allure of exotics into their home. Mannington is providing just that with the new Atlantis collection of hardwood floors. Awe-inspiring exotic looks from around the globe are featured in a 5"-wide plank to showcase the rich grain of each wood.

Atlantis is comprised of four species in 2 distinct visual categories:

- Hand-Sculpted Royal Mahogany -The dramatic effect of hand-sculpting perfectly accents the flowing ribbons of grain in this unique species to create a one-of-a-kind visual. The hand-rubbed stain accentuates the grain to create an almost translucent effect that is sure to wow even the most particular consumer.
- Hand Sculpted Acacia - Rustic in nature, Acacia displays the visual quality of hand-hewn artisan artifacts. This exotic species displays all of the characteristics of a timeless hand-scraped floor. The undulating scraping enhances the natural flow of the grain and creates a look that is both exotic and traditional.
- Antique Finished Imperial Tigerwood - Imperial Tigerwood's striping displays a strength and boldness that is both unique and beautiful. The antique smooth

finish and tiger-striped graining create a stunning visual that will be the focal point of any room in the home

- Antique-Finished Sapele - A distinctive and striated pattern, Sapele, displays a warm character that is elegant and contemporary. The classic antique finish, coupled with the natural glow and luster of the graining, is a perfect complement to any home décor.

These floors all have Mannington exclusive ScratchResist™ for superior durability, and are backed by Mannington's 25-year Gold Warranty. They will be available exclusively at fine flooring retailers beginning April 2007.
