

MANNINGTON HARDWOOD – Atlantis Prestige
SURFACES 2008 INTROS

**ATLANTIS PRESTIGE COLLECTION BRINGS MANNINGTON HARDWOOD
TO A WHOLE NEW LEVEL**

The unique styling and design of Mannington's new Atlantis Prestige collection of hardwood floors unlocks the mysterious beauty contained in its five exotic species, and helps homeowners create a tropical oasis in any room.

The collection not only features new hardwood looks, but answers the call for longer and wider planks – Atlantis Prestige planks come in lengths up to 7 feet, and are 5.16" wide. In addition, the 3.2" millimeter sawn face is thicker than that of other engineered hardwood products, and comes with a warranty that covers 25 years and the ability to sand and refinish twice.

The Atlantis Prestige collection includes:

Andean Pecan: With exquisite character, unique texture, and intricate graining, Andean Pecan comes in two dramatic colors – lighter, yet dramatic, Natural and rich, dark Tobacco.

Santos Mahogany: In its Natural color, the richness of the underlying golden hues that are indicative of this species shines through.

Amendoim: Characterized by subtle graining and color variation, Amendoim offers true beauty in two colors, warm glowing Natural and elegant Brick.

Brazilian Cherry: Updated and richer than before, colors Sunkissed and Dusk are inspired by the heat and passion that Brazil is known for.

Tigerwood: In Natural, a bold, but not overly aggressive, grain lets the beauty of Tigerwood take center stage.

“Atlantis Prestige is a collection that we believe will be a phenomenal success,” said Mannington’s Director of Hardwood Business, Dan Natkin. “It’s got what it takes to stand out among other products because of its unique use of color and species, and its longer, wider plank format.”

The collection, introduced at Surfaces, will be available in early February, 2008.
