

MANNINGTON RESILIENT – Adura Elements
SURFACES 2008 INTROS

**MANNINGTON TAKES ADURA LUXURY FLOORING TO NEW HEIGHTS WITH
ADURA ELEMENTS**

Introducing Adura Elements, a modular LVT system that offers designer-inspired custom floor designs at a price that won't break the bank.

Adura Elements marries design and color with size and shape for the most innovative LVT offering in the industry. The line is comprised of five different field tiles; each in three sizes (6"x6"; 12"x12" and 12"x24") and three suggested stylish layouts. Add to that the four decorative 6"x6" accent tile options – two metallic and two deco-stone – and the offering expands to 28 different combinations.

With looks and features like that, it will practically sell itself. But to make Adura Elements even easier for consumers to appreciate, it will have its own 'stair-step' display featuring orientation panels that help the consumer visualize the perfect modular look for her home.

Adura Elements will be available at fine flooring retailers in the second half of 2008.
