MANNINGTON FLOOR CARE INSTRUCTIONS

- Use doormats outside each entrance to your home to prevent dirt, sand, grit or other substances such as oil, asphalt and driveway sealer from being tracked onto your floor. Use mats labeled non-staining on your floor.
- To minimize staining from asphalt tracking, we suggest you use latex-based driveway sealer on your driveway.
- Support furniture with wide-bearing, non-staining floor protectors. The protectors should be at least one inch in diameter, made of non-pigmented hard plastic, and rest flat on the floor. Non-staining felt protectors are also acceptable. Casters with a minimum $\frac{3}{4}$ " flat surface width or floor protectors are recommended for all movable furniture. Make sure any metal protectors are rust-proof. Replace your narrow dome furniture rests with wide-bearing ones.
- If you need to move heavy furniture and/or appliances across the floor, always use strips of wood or hardboard runways to protect the floor. Always use runways even if you have an appliance dolly or even if heavy objects are equipped with wheels or rollers.
- Sweep your floor regularly (at least once per week).
- Prevent stains by wiping up spills immediately.
- Occasional cleaning with Mannington UltraClean™ (lightly misted) and a microfiber mop (or cloth) or mopping with Mannington Award Series® Rinse-Free Cleaner is recommended when dirt builds up and sweeping alone is not sufficient. Use a solution of 2 to 3 capfuls of Award Series® Cleaner (or clear, non-sudsy ammonia) in one gallon of warm water. Use of more than the recommended amount of cleaning solution may leave a dulling film. Do not use soap or detergent products as they will leave a dulling film. Rinsing is not required when using Mannington Award Series® Rinse-Free

Cleaner, but if time permits, rinsing will provide the best care.

- Adura is a low-gloss floor; use polish or "mop and shine" products only if you wish to make the floor shiny.
- After several applications of polish for a high-shine floor, an occasional stripping and reapplication of polish may be necessary. We recommend the use of Mannington Award Series® Heavy Duty Cleaner and Stripper. After thorough cleaning, rinsing and drying, we recommend applying Mannington Award Series® High-Gloss Polish to restore the shine. Do not use wax. Do not buff. High traffic areas may require more than one application of polish. Allow polish to dry "tack-free" between coats.

For complete instructions regarding the proper use of Mannington floor care products, refer to the package labels.

Caution: Adura Floors can be slippery when they become wet. Use extreme caution when walking on a wet floor.

The overall stain resistance of our Mannington Adura is excellent and most spills will wipe off quickly and easily with a clean, white cloth. Removing certain substances may take a little extra effort, as outlined in the chart below.

- Start with first step listed.
- Only do steps necessary to resolve the problem.
- Always use a clean, white cloth for wiping up stains and turn it frequently to avoid spreading the stain.
- Rinse with clean water and allow area to dry between steps.
- If stain removal causes a change in gloss level, apply polish per recommended guidelines.
